

RIVER MURRAY FLOW REPORT

Public I2 A2

Report #30/2014

Issued 10:00 am 25 July 2014

This supersedes the previous flow report issued by the Department of Environment, Water and Natural Resources (DEWNR) on 18 July 2014. The next flow report will be provided on Friday, 1 August 2014.

In this report, for ease of representation, large volumes of water are expressed in gigalitres (GL), while smaller volumes are expressed in megalitres (ML). One GL is equal to 1 000 ML.

FLOW OUTLOOK

The flow at the South Australian border is approximately 12.5 GL/day and will increase to around 16 GL/day during the coming week, depending on upstream river and storage operations, extractions, and rainfall events. The flow comprises the normal July Entitlement Flow of 3.5 GL/day minus Entitlement Flow that was delivered early (in June), plus unregulated flow.

Construction works at the Lake Victoria outlet regulator will continue into late August 2014. These works are restricting the outlet capacity. DEWNR is working closely with the Murray-Darling Basin Authority and SA Water to manage the flow to South Australia during this time.

The flow over Lock 1 is approximately 8 GL/day and will increase to around 14 GL/day during the coming week, depending on weather conditions and extractions.

It is important to note that flow forecasts in this advice are based on the information available at the time of preparation. They may change as new gauging information becomes available, or due to rainfall events or changed operations upstream. Flow forecasts are dependent on predictions made by the Bureau of Meteorology, Murray-Darling Basin Authority and water management agencies in upstream jurisdictions. They will be revised as new information becomes available.

MANAGEMENT OF SOUTH AUSTRALIA'S DEFERRED WATER

On 1 July 2014, South Australia had deferred 30 GL of its Entitlement Flow into storage to meet critical human water needs use in future dry years and 20 GL for private carryover use in future dry years. The volume of deferred water in the upstream storages is adjusted for net evaporation losses until it is delivered to South Australia. There is currently a high risk of some private carryover water spilling from Lake Victoria. South Australia cannot defer any water while receiving unregulated flow. Therefore South Australia is not proposing to defer any Entitlement Flow in August 2014.

DEWNR is investigating opportunities to defer additional Entitlement Flow during 2014-15.

BARRAGE OPERATIONS AND WATER LEVELS IN THE LOWER LAKES

The water level in Lake Alexandrina is approximately 0.75 m AHD and approximately 0.76 m AHD in Lake Albert. The volume of water in the Lower Lakes is being managed to optimise water availability for continuous barrage releases during winter. SA Water will continue to operate the barrages to minimise any negative salinity impacts from reverse flow events. When conditions are conducive to opening the barrages, releases will be prioritised through Tauwichee and Goolwa. All fishways are in operation.

To see live salinity data at various locations on the River Murray and in the Lower Lakes, please refer to the following website: <http://www.waterconnect.sa.gov.au/Systems/RTWD/SitePages/Home.aspx>

Water levels and barrage operations are monitored closely by various agencies of the South Australian Government, Murray-Darling Basin Authority and Commonwealth Environmental Water Office.

WATER QUALITY – Blue-Green Algae

The New South Wales Government (through Regional Algal Coordinating Committees) has a red alert warning for toxic blue-green algae at Balranald on the Murrumbidgee River, where water is unsuitable for recreational and stock watering purposes.

Although toxic blue-green algal blooms pose no threat to South Australia at this stage, the Murray-Darling Basin Authority and the relevant South Australian Government agencies are regularly monitoring the situation.

NAVIGATION ISSUES

Sandbars in the vicinity of the Murray Mouth may cause navigation hazards. Mariners are advised to navigate with caution when operating in the area. Sandbars are also present along sections of the River Murray, downstream of Lock 7 and 8 and in South Australia. All watercraft users should be aware of the risk of submerged navigation hazards, and should regularly check the river depth.

CONSTRUCTION WORKS

Lock 4

Remedial works at Lock 4 commenced on 5 May 2014 and are expected to be completed by early August 2014. The works are necessary to improve the structural integrity of the Lock chamber. During this period Lock 4 will be closed to navigation.

Chowilla

Construction of the Chowilla Creek Environmental Regulator and associated structures is nearing completion. For public safety reasons, the Chowilla Creek remains closed to navigation at the construction site at this time.

Lake Victoria Outlet Regulator

Remedial works on the Lake Victoria Outlet Regulator are underway and expected to be completed in late August 2014. The works are necessary to improve the structural integrity of the regulator.

Camping is not allowed in the area immediately downstream of the regulator during the construction period. There are alternate camping sites nearby, along Rufus River.

Lock 11

Installation of mechanised gates at Lock 11 (Mildura) commenced on 15 July 2014 and is expected to be completed in mid-August 2014. During this period the water level in the Lock 11 weir pool will be drawn down to a very low level and the Lock will be closed to navigation.

RIVER MURRAY WATER LEVELS

Below is a table of River Murray water levels at a number of locations from Lock 10 (near Wentworth) to Murray Bridge.

River Murray Water Levels on 23 July 2014

| Location | River km | Normal Pool Level | Current Level (m AHD) | 1974 Flood Level (m AHD) | 1993 Flood Level (m AHD) |
|--------------------|----------|-------------------|-----------------------|--------------------------|--------------------------|
| Lock 10 | 825.0 | 30.80 | 30.86 | 33.81 | 33.32 |
| Lock 9 Kulnine | 764.8 | 27.40 | 27.46 | 30.03 | 29.44 |
| Lock 8 Wangumma | 725.7 | 24.60 | 24.38 | 27.60 | 27.19 |
| Lock 7 Rufus River | 696.6 | 22.10 | 22.14 | 25.70 | 25.24 |
| Lock 6 Murtho | 619.8 | 19.25 | 19.26 | 21.03 | 20.50 |
| Renmark | 567.4 | - | - | 18.54 | 18.04 |
| Lock 5 | 562.4 | 16.30 | 16.32 | 18.07 | 17.50 |
| Lyrup | 537.8 | - | 13.27 | 16.85 | 16.26 |
| Berri | 525.9 | - | 13.24 | 15.81 | 15.74 |
| Lock 4 | 516.2 | 13.20 | 13.21 | 15.65 | 15.08 |
| Loxton | 489.9 | - | 10.04 | 15.05 | 14.12 |
| Cobdogla | 446.9 | - | - | 13.44 | 12.38 |
| Lock 3 | 431.4 | 9.80 | 9.90 | 13.16 | 12.02 |
| Overland Corner | 425.9 | - | 6.29 | 12.73 | 11.58 |
| Waikerie | 383.6 | - | 6.29 | 11.26 | 10.24 |
| Lock 2 | 362.1 | 6.10 | 6.15 | 10.28 | 9.30 |
| Cadell | 332.6 | - | 3.33 | 9.17 | 8.08 |
| Morgan | 321.7 | - | 3.31 | 8.85 | 7.65 |
| Lock 1 Blanchetown | 274.2 | 3.20 | 3.24 | 6.81 | 5.38 |
| Swan Reach | 245.0 | 0.75 | 0.69 | 6.06 | 4.51 |
| Mannum PS | 149.8 | 0.75 | 0.67 | 3.15 | 1.90 |
| Murray Bridge | 115.3 | 0.75 | 0.63 | 2.06 | 1.26 |

Note that the above water levels may be affected by local wind conditions.
