

# RIVER MURRAY FLOW REPORT

Public I2 A2

Report #19/2014

Issued 10:00 am 9 May 2014

**This supersedes the previous flow report issued by the Department of Environment, Water and Natural Resources (DEWNR) on 2 May 2014. The next flow report will be provided on Friday, 16 May 2014.**

In this report, for ease of representation, large volumes of water are expressed in gigalitres (GL), while smaller volumes are expressed in megalitres (ML). One GL is equal to 1 000 ML.

## FLOW OUTLOOK

The flow at the South Australian border is approximately 3 700 ML/day and is likely to remain around this rate during the coming week, depending on upstream river and storage operations, extractions, and rainfall events. The flow comprises the normal May Entitlement Flow of 3 000 ML/day and environmental water from the Commonwealth Environmental Water Holder.

The flow over Lock 1 is approximately 2 900 ML/day and is likely to reduce to around 2 700 ML/day during the coming week, depending on weather conditions and extractions.

It is important to note that flow forecasts in this advice are based on the information available at the time of preparation. They may change as new gauging information becomes available, or due to rainfall events or changed operations upstream. Flow forecasts are dependent on predictions made by the Bureau of Meteorology, Murray-Darling Basin Authority and water management agencies in upstream jurisdictions. They will be revised as new information becomes available.

## MANAGEMENT OF SOUTH AUSTRALIA'S DEFERRED WATER

On 1 May 2014, South Australia had deferred 30 GL of its Entitlement Flow into storage to meet critical human water needs use in future dry years and 20 GL for private carryover use in future dry years. The volumes of stored water held in the upstream storages will be adjusted for net evaporation losses. South Australia is not proposing to defer any of its Entitlement Flow during May or June 2014 due to the lower monthly Entitlement Flow and the risk of spill from Lake Victoria due to recent rainfall and water level limits related to the works on the outlet regulator.

## BARRAGE OPERATIONS AND WATER LEVELS IN THE LOWER LAKES

The water level in Lake Alexandrina is approximately 0.67 m AHD and approximately 0.64 m AHD in Lake Albert. The volume of water in the Lower Lakes is being managed to maximise water availability for continuous barrage releases during autumn and winter. All fishways are in operation. Barrage releases are being prioritised through Tauwichee and Goolwa in the bays next to the fishways, to provide attraction flow. SA Water will continue to operate the barrages to minimise any negative salinity impacts from reverse flow events.

To see live salinity data at various locations on the River Murray and in the Lower Lakes, please refer to the following website: <http://www.waterconnect.sa.gov.au/Systems/RTWD/SitePages/Home.aspx>

Water levels and barrage operations are monitored closely by various agencies of the South Australian Government, Murray-Darling Basin Authority and Commonwealth Environmental Water Office.

## WATER QUALITY – Blue-Green Algae

The New South Wales Government (through Regional Algal Coordinating Committees) has issued red alert warnings for toxic blue-green algae at:

- Menindee Lakes and the Great Darling Anabranch at, and upstream of, Tara Downs, where the water is unsuitable for stock and domestic, irrigation and recreational purposes;

- Balranald on the Murrumbidgee River, where the water is unsuitable for recreational and stock watering purposes; and
- downstream of Barren Box Swamp on the Murrumbidgee River, where the water is unsuitable for irrigation, stock and domestic purposes.

Although these toxic blue-green algal blooms pose no threat to South Australia at this stage, the Murray-Darling Basin Authority and the relevant South Australian Government agencies are regularly monitoring the situation.

### **NAVIGATION ISSUES**

Sandbars in the vicinity of the Murray Mouth may cause navigation hazards. Mariners are advised to navigate with caution when operating in the area. Sandbars are also present along sections of the River Murray in South Australia and all watercraft users should be aware of, and regularly check, the river depth.

### **CONSTRUCTION WORKS**

#### *Goolwa Barrage Lock*

Remedial works are scheduled to commence on the Goolwa Barrage Lock Chamber on 19 May 2014 and expected to be completed by mid-June 2014. The works are vital to the longevity of the structure. During the work period, the Lock will be closed to navigation. Vessels may still be launched directly into the Coorong via:

- Beacon 19 Boat Ramp (downstream of Goolwa);
- Mundoo Boat Ramp; and
- Tauwitchere Lock.

#### *Mannum River Vessel Waste Disposal Station*

The Mannum River Vessel Waste Disposal Station will be re-commissioned today and will be operational on Saturday, 10 May 2014.

#### *Swan Reach River Vessel Waste Disposal Station*

Upgrade works commenced on the Swan Reach River Vessel Waste Disposal Station on 1 May 2014. The works will take about two months to complete. A temporary waste pumping service is being provided by Swan Reach Septic Pumping and Maintenance. The phone number and details of the service are available at the station and advertised in the local media.

#### *Lock 4*

Remedial works at Lock 4 commenced on 5 May 2014 and are expected to be completed by early August 2014. The works are necessary to improve the structural integrity of the Lock chamber. During this period Lock 4 will be closed to navigation.

#### *Mullaroo Creek*

Remedial works in the Mullaroo Creek (located in Victoria and flows into the Lindsay River, which enters the River Murray between Lock 6 and 7) are expected to be completed around the end of July 2014. The works are necessary to improve the control of flows in this system. For public safety reasons the Mullaroo Creek will be closed to navigation at the work site during the construction period.

#### *Chowilla*

Construction of the Chowilla Creek Environmental Regulator and associated structures is ongoing. For public safety reasons, the Chowilla Creek remains closed to navigation at the construction site. Works are also underway to upgrade the weirs on Pipeclay Creek and Slaney Creek to improve the management of flows into the Chowilla anabranch and to enable fish passage. The weirs are closed to boat traffic during this construction program.

#### *Lake Victoria Outlet Regulator*

Remedial works on the Lake Victoria Outlet Regulator are underway and expected to be completed around the end of July 2014. The works are necessary to improve the structural integrity of the regulator. Camping is not

## River Murray Flow Report

allowed in the area immediately downstream of the regulator during the construction period. There are alternate camping sites nearby, along Rufus River.

### *Lock 11*

Pre-works for the installation of mechanised gates at Lock 11 (Mildura weir pool) are scheduled to commence in mid-June and will take approximately one week. Installation of the mechanised gates will commence in mid-July and is expected to be completed in mid-August 2014. During this period Lock 11 will be closed to navigation.

## RIVER MURRAY WATER LEVELS

Below is a table of River Murray water levels at a number of locations from Lock 10 (near Wentworth) to Murray Bridge.

### River Murray Water Levels on 7 May 2014

Location	River km	Normal Pool Level	Current Level (m AHD)	1974 Flood Level (m AHD)	1993 Flood Level (m AHD)
Lock 10	825.0	30.80	30.90	33.81	33.32
Lock 9 Kulnine	764.8	27.40	27.47	30.03	29.44
Lock 8 Wangumma	725.7	24.60	24.95	27.60	27.19
Lock 7 Rufus River	696.6	22.10	22.07	25.70	25.24
Lock 6 Murtho	619.8	19.25	19.34	21.03	20.50
Renmark	567.4	-	-	18.54	18.04
Lock 5	562.4	16.30	16.39	18.07	17.50
Lyrup	537.8	-	13.31	16.85	16.26
Berri	525.9	-	13.30	15.81	15.74
Lock 4	516.2	13.20	13.28	15.65	15.08
Loxton	489.9	-	10.10	15.05	14.12
Cobdogla	446.9	-	-	13.44	12.38
Lock 3	431.4	9.80	9.93	13.16	12.02
Overland Corner	425.9	-	6.37	12.73	11.58
Waikerie	383.6	-	6.52	11.26	10.24
Lock 2	362.1	6.10	6.31	10.28	9.30
Cadell	332.6	-	3.42	9.17	8.08
Morgan	321.7	-	3.40	8.85	7.65
Lock 1 Blanchetown	274.2	3.20	3.34	6.81	5.38
Swan Reach	245.0	0.75	0.63	6.06	4.51
Mannum PS	149.8	0.75	0.63	3.15	1.90
Murray Bridge	115.3	0.75	0.57	2.06	1.26

Note that the above water levels may be affected by local wind conditions.
