## Groundwater Data

[www.WaterConnect.sa.gov.au/Systems/GD/](http://www.WaterConnect.sa.gov.au/Systems/GD/)

Find information on wells and groundwater in South Australia using this interactive online map.

Groundwater Data has information on over 240,000 registered wells across South Australia. It is easy to browse for wells using the Google Maps platform, including satellite imagery. Other search options include by property, well construction permit number, and GPS coordinates.

Trends in groundwater and salinity levels are monitored over time using data from both private and government wells, assisting in groundwater resource management.
